Senior Software Engineer Costa Rica

Apply Now

Company: Imprivata

Location: Costa Rica

Category: computer-and-mathematical

Description

Come join a winning team! Here at Imprivata, you'll see a dedicated group of professionals who care about improving healthcare. Our team thrives on collaboration and sharing ideas, whether in a cross-functional meeting or at one of our virtual team-building events.

While we're diverse in our backgrounds and skills, we have much in common. A passion for our mission. A strong sense of integrity. A belief that we're making a positive impact and a commitment to having fun.

We are seeking a Senior Software Engineer to join our team for this remote opportunity out of Costa Rica!

Job Summary

The Senior Software Engineer works as a member of the software development team responsible for the development of Imprivata's OneSign client components, which provide Multifactor Authentication and Single Sign-On services for applications.

The Senior Software Engineer – OneSign Client has knowledge of the Windows application and development, as well as a proven record of delivering products that fully utilize the facilities of the Windows OS. This role leverages our own software and that of Imprivata's partners to bring an efficient and secure application experience to clinicians and providers.

Duties and Responsibilties

Develop new OneSign features in the areas of security, authentication, single sign-on and healthcare workflow enablement. Our agent is used by thousands of clinicians all over the

world.

Design, code and test client-side components in C++ that deliver our entire client experience.

Design and code unit and automated tests that allow manual testing to focus high risk areas.

Assist QA in qualifying new vendor releases, including APIs, to determine ongoing compatibility with OneSign.

Working in a scrum team model, be responsible for analyzing possible solutions, scoping, planning and delivering software

Qualifications

5+ years of software engineering experience designing and building enterprise applications.

Strong C++ development and debugging skills

Experience with Visual C++, Windows and/or Win32 APIs

Experience with Linux a plus

Experience with Python a plus

Experience integrating third-party APIs or SDKs into an enterprise product a plus

Client-server architecture

Experience in versioning tools such as Perforce, Git, etc.

Experience in Jira and Confluence etc.

Strong proven design skills with the ability to work well in a dynamic, fast-paced environment with high expectations.

Solid experience with the full software development life cycle and a proven track record in successfully bringing products to market

Excellent written and verbal communication skills, and the ability to interact well with both internal teams and external customers and partners

Minimum of a bachelor's degree in computer science or related degree

At Imprivata, we have a top-notch work environment, developmental opportunities, a competitive total rewards package, and the desire to have fun. If you have the skills and qualifications as we have described above, we want to hear from you!

Imprivata provides equal employment opportunities, regardless of race, religion, age, sex, national origin, disability status, protected veteran status, sexual orientation, gender identity or expression, or any other characteristic protected by federal, state or local laws.
